

## **LEAKAGE RESISTANT SHROUD HANGER**

### **Abstract of the Disclosure**

Disclosed is a submersible pumping system for pumping wellbore fluids. The  
5 submersible pumping system includes a motor assembly, a pump assembly connected to  
the motor assembly, and a shroud assembly attached to the pump assembly. The shroud  
assembly includes a shroud having a connection end and an intake end. The shroud  
assembly at least partially encloses the motor assembly and includes a sealing ring  
adjacent the shroud prevents the wellbore fluid from entering the shroud at the  
10 connection end. The shroud assembly also preferably includes a retaining ring that holds  
the sealing ring in place.
